ASSYRIAN

NSW Police Force

STAY AT HOME/NO VISITORS:

- Stay at home with your immediate family. Your immediate family is those who live in the same house and sleep there every night.
- You should not have any visitors to your home. This includes family members who don't live with you.
- Don't put your mother, grandmother, aunt or uncle at risk by visiting other family members.
- Stay at home means stay at home. Don't visit friends or family. The time for visits will come once we have stopped the virus from spreading.

TESTING:

- Get tested as soon as you feel unwell. If you feel unwell a few days after getting tested, go get tested again. You must get tested if you are a close or casual contact.
- Just because you don't have any symptoms, does not mean you don't have COVID. You could still be very infectious.

MASKS:

- If you have to leave your home, you must have a mask with you at all times. You need to wear it in communal areas of residential buildings, indoor areas such as supermarkets, and outdoors when around others such as in queues waiting for public transport or food.

GENERAL:

- We're all in this together. We must look after each other.
- Compliance is essential to protect you, your loved ones and your communities.
- Together we can beat this virus and help stop the spread, but we need you to work with us.
